

## Senior Sourcing and Supply Specialist

Our client, based in Libertyville, IL is a world leader in the Medical Device industry. Built on the foundation of helping better the lives of those they serve and leaving a legacy of achievement, they seek an experience Procurement professional.

This is a fast-track role with high visibility and the ability to make significant contributions to the organization and jump start your career. To be considered for the key corporate global sourcing role you should have 2-5 years of direct experience in the following areas:

**Material Sourcing:** Evaluate alternative strategies to make sound sourcing selection decisions for strategic materials and major commodities. Will involve Quality Management and other technical functions to evaluate supplier's compliance with GMP, FDA and ISO 9000 requirements.

**Material Costs:** Initiate and manage cost improvement programs with key suppliers for strategic materials and major commodities resulting in measurable savings, cost control and rationalized levels of inventory.

**Purchasing at Source:** Monitor tactical purchasing activities performed by plant purchasing for assigned Tier 1 and Tier 2 suppliers. Maintain and revise item master parameters in SAP for assigned materials.

**Supplier Performance:** Monitor quality, delivery, price and service performance of key suppliers and score card results. With plant purchasing involvement, conduct supplier performance reviews and implement corrective action plans when appropriate.

**Supply Agreements:** Coordinate supplier input with R&D and Quality Management to reach consensus that specification requirements match supplier's process capabilities.

**Education:** BS degree required; MS degree preferred

**Specialized or Technical Knowledge:**

Certified Purchasing Manager (CPM) required

Familiar with Supply Chain Management (SCM) Practices preferred

Familiarity with SAP R3 ERP and Business Warehouse (BW) Systems; prior work experience in Medical Device Industry.
