SUPPLY CHAIN MANAGEMENT MAJOR INTERNSHIP PROGRAM AT AMERICAN AIRLINES

The internship program is designed to provide an opportunity for students to gain valuable experience with American Airlines by being engaged in the various aspects of supply chain management. The student would be able to apply the knowledge they have learned, in the classroom and from other internships.

- The intent is to expand that static knowledge in a dynamic setting and to assist American Airlines in a productive manner. The student will then bring that knowledge back to their university and share their experience and insight in the classroom enriching other students and faculty.
- American Airlines is able at a low cost, to utilize the services of a student whose education and drive is focused on serving this industry. American Airlines has an opportunity to evaluate a potential employee and give current employees additional leadership experience as they mentor the student. American Airlines will provide feedback to the university on the internship program they help shape the source of future employees.

After the students have been at American Airlines for a couple of weeks they are expected, with minimal direction, to undertake a variety of projects such as spreadsheet analysis, logistics systems analysis, report preparation, presentation development. Our plan is to assign projects to the students that can be completed during their internship.

Academic Assignments:

While serving as interns at American Airlines the students are encouraged to keep a daily log that describes the type of activity that they are engaged in each working day. Upon their return to the university, the students are permitted to make a formal presentation to the faculty or in one of the Supply Chain Management courses. The formal presentation will either describe the operations of American Airlines or a project that the student completed. *The student will be prohibited from discussing confidential business information.*

Evaluation:

American Airlines will provide an objective evaluation of the student's performance and the intern program process. To provide continuous improvement for the internship program.
