

## Supply Chain Manager

Looking for a Supply Chain Manager for a manufacturing company in Watertown, NY. The Supply Chain Manager is responsible for the timely delivery of all raw materials, equipment and supplies. The Supply Chain Manager approves all raw materials, supplies, and equipment for all operations including maintenance, engineering and office. They want someone that can negotiate long term contracts with vendors, design rebate programs, negotiate utilities, find different vendors, etc. Someone that is strategic. This person will not have a staff but will work closely with shipping. It's a union environment and they prefer someone that has manufacturing and logistics experience. Paper or chemical industry is ideal, but not required. BS in engineering or supply chain management is preferred. \$60-\$80k + bonus. Will pay relocation expenses for the right candidate.
