

I am a Whitman alum an HR Business Partner at a Manufacturing Plant in Clearwater, FL. We are currently having a hard time sourcing entry level candidates for a Material Analyst position. I've included the requisition below for your viewing. We are specifically looking for someone with the APICS certification. I happen to know that APICs is offered as a part of the MS in Supply Chain Management at Syracuse. Do you think you'd have any interested students? Relocation is negotiable.

**Job Code/Title
(Do not update)** E4562: Procrmnt, PIng & Cntrl

Standard Job Description Sources, purchases, plans, and schedules the movement of raw materials, packaging materials, parts, components, services, supplies, finished goods and related material through production and inventory process. Identifies raw material, component, and related requirements from engineering and production specifications and schedules. Purchases, plans, and coordinates resulting material movement throughout manufacturing and inventory sequences. In front-end procurement mode, analyzes data and determines factors that affect prices and determines lowest cost consistent with quality, reliability, and ability to meet required schedules. Reviews proposals, negotiates prices, selects or recommends suppliers, analyzes trends, follows up orders placed, approves payment, and maintains necessary records of material movement throughout manufacturing and inventory cycle(s). Coordinates and follows up with production, warehouse, and engineering personnel to ensure appropriate procurement, scheduling, and movement of materials and services.
