

Purchasing intern positions at Magna Powertrain and New Process Gear (Syracuse area)

We are winding down the NPG plant over the next year. I need two students, as soon as possible, who could work approximately 20 hours/week. This will not be an easy assignment. I intend to direct the bulk of their activity, so SAP use is probably the bulk of the job, some ERFQ work in our ERFX system, excel spreadsheets to track projects and supplier inventory, along with data transfer to the Mexico division.

Contact the Whitman Career Center if interested.
